About Me

A Mechatronics Engineering student with skills in mechanical design, SolidWorks, AutoCAD, MATLAB, and C programming. Eager to apply technical knowledge and contribute to engineering innovations while continuously improving my skills, with a strong interest in MEP systems (interested in HVAC, Fire Fighting and plumbing).

Education

Bachelor of Mechatronics Engineering

2022 – 2027

Horus University, New Damietta

Experiences

- **Basmat Khebra Co. – Saudi Arabia (2024, 3 months)**
Practical training in fire-fighting systems, fire alarm systems, and BMS (Building Management Systems).
- **Belayiem Petroleum Co. (Petrobel) – Egypt (2025)**
Exposure to petroleum industry operations and site visits.
- **Al Shams Contracting Co. – Egypt (2025, 1 week)**
Training on MEP (Mechanical, Electrical, and Plumbing) systems and contracting works.
- **Al Rowad Contracting Co. – Egypt (2025, 1 week)**
Training on MEP systems including HVAC, Plumbing, and Fire Fighting applications
- **CNC Training – Horus University, Egypt (2024, 1 week)**
Introduction to CNC machining, learned G-code basics and practical applications.

Skills

- | | |
|--|---|
| ➤ Technical Skills | ➤ Soft Skills |
| • Design & CAD: Proficient in SolidWorks & AutoCAD. | • Communication: Strong in Arabic & English. |
| • Programming: Skilled in C & MATLAB for problem-solving and simulations. | • Problem-Solving: Analytical & critical thinking. |
| • 3D Printing: Experience in designing and prototyping. | • Teamwork: Effective collaboration on projects. |
| • Electronics: Familiar with Arduino & microcontrollers. | • Time Management: Meeting deadlines efficiently. |
| • Software: Proficient in Microsoft Office (Word, Excel, PowerPoint). | • Typing: Fast & accurate documentation |

Projects

- Fire Alarm System – Sensor-based detection and alert circuit.
- Spur Gear Gearbox – Mechanical gearbox design and assembly.
- Robotic Arm – Pick and place operations using motors and controllers.
- Smart Shopping Cart – Line follower & remote-controlled prototype.

Courses and certificates

SOLIDWORKS Course from INNOVATEX

MATLAB Course hosted by IEEE Student Branch

Firefighting & Safety Systems – Online self-study course by Ibrahim Lashien (YouTube).

HVAC Systems – Online self-study course by Ibrahim Lashien (YouTube).
